The Center for Business and Economic Research gratefully acknowledges the support of individuals and organizations that identified and provided sources for data for the 1988 Kentucky Statistical Abstract.

PREFACE

Information is the foundation for sound planning and decision making. As an accumulation of a wide range of economic and social information, the **1988 Kentucky Statistical Abstract** is presented to provide a convenient source of statistical information regarding the Commonwealth and its counties. The need for this kind of document has increased in recent years as many federal agencies have scaled back publication programs and increased prices for statistical publications. In response to this growing need, the Center for Business and Economic Research undertook the preparation and publication of this abstract as part of its mission to monitor and report on the Kentucky economy. This new effort complements existing programs that include the annual publication of the **Kentucky Annual Economic Report**, the quarterly publication of **Review and Perspective**, and the ongoing maintenance of the computerized Kentucky Economic Information System. To encourage wide circulation, the abstract has been priced so that its cost to users is as low as possible and only covers marginal printing costs.

When possible, past as well as current data are presented to facilitate the analysis of trends. The abstract's first group of tables (number 1-57) focus on state level data for Kentucky. The second group of tables (number 58-99) are primarily county level data. The last group of tables (number 100-107) include some key regional or national figures, but focus primarily on the comparison of Kentucky with other states. Two appendices are included to facilitate the use and interpretation of the data. Appendix A explains some techniques for manipulating data in order to examine trends and relationships. Appendix B deals with concepts and definitions that underlie statistical information.

Numerous federal, state and other publications were used in compiling this abstract, as well as machine-readable data that are not available in printed form. The Center for Business and Economic Research gratefully acknowledges the cooperation and assistance of all organizations that provided source information. While every effort has been made to assure the accuracy of reproduction of data and calculations based on source data, the Center for Business and Economic Research assumes responsibility for any errors that may be present and requests that users of the abstract notify the Center for Business and Economic Research of errors that they may find.

Those who intend to use data contained in the abstract for research where the methodology guiding their collection must be explained and the choice of statistical measures defended are cautioned to pay particular attention to the footnotes following tables and may wish to contact the original sources of the information directly, using the source notes at the end of each table as a guide. Also, care should be exercised in interpreting year-to-year changes in data, especially with regard to government revenue, expenditures, and programs, because such changes often are the result of new laws or regulations.

In producing this first edition of the **Kentucky Statistical Abstract**, it was necessary to make choices regarding the emphasis of various topics and geographic areas. Future, expanded editions of the abstract are planned, and the Center for Business and Economic Research welcomes suggestions from users of the abstract regarding additional topics, expanded detail, different geographic areas, or extended time frames for data that would make future editions more useful to them.

Carol M. Straus, Editor

TABLE OF CONTENTS

Table Title	Table Number
Population by Age and Race, Percent Change and Distribution, Kentucky, 1970-1986	1
Resident Live Births by Age and Marital Status of Mother, and Race of Child, Kentucky, 1986	2
Resident Deaths by Major Cause of Death, Number and Crude Rate, Kentucky, 1950-1986	3
Resident Live Births and Deaths: Total, Fetal, Infant, Neonatal and Maternal Number and Crude Rates: Kentucky, 1950-1986	4
Gross State Product by Selected Industries, Kentucky, Total for Southeast Region and United States, 1970-1986	5
Personal Income Summary with Derivation and Earnings by Major Industry, Kentucky, 1980-1987	6
Wage and Salary Disbursements, Kentucky and United States, 1980-1987	7
Earnings by Industry by Place of Work for Nonfarm Industries, Kentucky, 1980-1987	8
Jobs by Type and Industry, Kentucky and the United States, 1980-1987	9
Wage and Salary Jobs, Kentucky and United States, 1980-1987	10
Full and Part Time Jobs by Industry by Place of Work for Nonfarm Industries, Kentucky, 1980-1987	11
Civilian Labor Force, Unemployment and Employment by Major Industry, Kentucky and the United States, 1980-1987	12
Employment Status of the Experienced Civilian Labor Force by Industry, and Percent Distribution of Employed Civilians by Sex, Race & Industry, Kentucky, 1986 Annual Averages	13
Employment Status of the Experienced Labor Force by Occupation, and Percent Distribution of Employed Civilians by Occupation, Sex & Race, Kentucky, 1986 Annual Averages	14
Percent Distribution of Unemployed Persons by Sex, Age, Race, Reason for, and Duration of Unemployment, Kentucky, 1986	15
Unemployment Insurance: Employer Contributions and Benefits Paid, by Industry, Kentucky, 1974-1986	16

Table Title	Table Number
Unemployment Insurance Covered Employment and Wages, Employer Contributions and Benefits Paid by Industry, Kentucky, 1987	17
Income of Farm Operators, Kentucky, 1982-1986	18
Value of Agricultural Exports, Kentucky, 1982-1986	19
Cash Receipts, by Commodity, Kentucky, 1982-1986	20
Principal Crops Ranked According to 1987 Value of Production, Kentucky, 1979-1987	21
Number and Value of Livestock on Farms, Kentucky, January 1, 1970-1987	22
Production and Value of Selected Crops, Kentucky, 1970-1987	23
Business and Industry Establishments by Major Industry Group, Kentucky, 1975, 1980, and 1985	24
Average Weekly Hours of Production Workers in Manufacturing Industries and Bituminous Coal Mining, Kentucky, 1975-1987	25
Average Weekly Earnings of Production Workers in Manufacturing Industries and Bituminous Coal Mining, Kentucky, 1975-1987	26
Average Monthly Production Workers in Manufacturing Industries and Bituminous Coal Mining, Kentucky, 1975-1987	27
Selected Manufacturing Statistics, by Industrial Sector, Kentucky, 1983, 1984, and 1984-85 Percent Change	28
Detailed Manufacturing Statistics, by Industrial Sector, Kentucky, 1985	29
Construction Industry Establishments with and without Payroll by Industry and Receipts Size Categories, Kentucky, 1982	30
Coal Production by Area and Type of Mine, Kentucky, Regions, and U.S., 1980-1986	31
Coal Mining Fatalities and Production by Type of Mine, Kentucky, 1953-1987	32
Electricity Generation, Sales, Fuel Costs, Fuel Consumption, and Fuel Receipts, Kentucky 1982-1986	33
Intergovernmental Revenue from the Federal and Local Governments to the State Government, by Source, Kentucky, 1975-1986	34

Table Title	Table Number
State General Fund Revenue, Tax and Nontax, by Fund, Kentucky, Fiscal Years 1982-83 through 1986-87	35
General Revenue of the State Government and Percent Distribution, by Source, Kentucky, 1975-1986	36
State Road Fund Revenue, Tax and Nontax, by Fund, Kentucky, Fiscal Years 1982-83 through 1986-87	37
State and Local Government Revenue by Level and Type of Government, Kentucky, Fiscal Years 1979-1980 to 1985-1986	38
State Revenue from Sales and Use Tax, by Business Classification, Kentucky, Fiscal Years 1980-1987	39
Federal Government Grants to State and Local Governments for Selected Programs, Kentucky, 1982-1986	40
Federal Government Loan and Insurance Programs, Kentucky, 1984-1986	41
General Expenditures of the State Government, by Function, Kentucky, 1975-1986	42
Capital Outlay of State and Local Governments for Selected Functions, Kentucky, Fiscal Years 1981-82 to 1985-86	43
State Government Employment by Branch and Status as of January 1, Kentucky, 1980-1988	44
State Government Total Employment by Branch and Cabinet with Selected Departments as of January 1, Kentucky, 1984-1988	45
Payrolls of State and Local Governments by Function, Kentucky, October 1981-1986	46
Full-Time Equivalent Employment of State and Local Governments by Function, Kentucky, October 1981, 1984, and 1986	47
Bonded Indebtedness of Local Governments by Type of Governmental Unit, Kentucky, 1980-1987	48
Indebtedness and Debt Transactions for State and Local Governments by Type, Kentucky, Fiscal Years 1983-84 to 1985-86	49
Facility Comparisons, Kentucky State Parks, Calendar Year 1987	50
State Park Camping Areas, Kentucky, 1987	51

Table Title	Table Number
Origin of Overnight Registration at Major State Parks, Kentucky, Calendar Year 1987	52
Criminal Arrests by Type of Crime with Percent Distribution and Change, Kentucky, 1985-1986	53
Public Schools, Kentucky, fiscal Years 1975-76 - 1986-87	54
Federal Government Direct Payments for Individuals for Selected Programs, Kentucky, 1982-1986	55
Transfer Payments by Program, Kentucky, 1980-1987,	56
Medicaid Eligibles, Utilizers, and Payments, by Basis of Eligibility and Type of Medicaid Service (Selected Categories), Kentucky, Fiscal Years 1975-1987	57
Population by Age, Kentucky and Counties, 1986	58
Population, Change, and Components of Change, Kentucky and Counties, 1980-1987	59
Total Population, Kentucky Cities, 1980-1986	60
Population Projections and Percent Change, Kentucky and Counties, 1980-2020	61
Total Number of Households and Population Per Household, Kentucky, 1970-1984	62
Housing Starts, Kentucky and Counties, 1981-1986	63
Births, Deaths, Marriages and Divorces, Kentucky and Counties, 1986	64
Median Family Income, Kentucky and Counties, 1979 and 1984-1987	65
Per Capita Money Income, Kentucky and Counties, 1979 and 1985	66
Per Capita Money Income, Kentucky Cities, 1979 and 1985	67
Poverty Rates, Kentucky and Counties, 1970 and 1980-1984	68
Per Capita Personal Income, Kentucky and Counties, 1980-1986	69
Components of Personal Income, Kentucky and Counties, 1986	70
Earnings by Industry by Place of Work, Kentucky and Counties, 1986	71

Table Title	Table Number
Civilian Labor Force, Employment, and Unemployment Rates, Kentucky and Counties, 1985-1987	72
Total Full and Part Time Jobs by Industry, Kentucky and Counties, 1986	73
Average Monthly Workers Covered by Kentucky Unemployment Insurance Law by Industrial Division, Ketnucky and Counties, 1986	74
Average Monthly Workers in Manufacturing Industries Covered by Kentucky Unemployment Insurance by Industrial Division, Kentucky and Counties, 1986	75
Selected Agriculture Statistics, Kentucky and Counties, Various Years	76
Business and Industry Establishments by Major Industrial Category, Kentucky and Counties, 1985	77
Coal Production in Tons Mined, by Type of Mine, Kentucky, Districts, and Counties, 1983-1987	78
Number of Coal Mines, by Type of Mine, Kentucky and Coal Producing Counties, 1970-1986	79
Gross Value of Coal Mined and Severance Tax Receipts, Kentucky, Regions, and Counties, 1985-1987	80
Mineral Industry Establishments by Industry Group, Kentucky and Selected Counties, 1982	81
Retail Trade Establishments and Sales by Selected Type of Business, Kentucky and Counties, 1982	82
Service Industry Establishments and Receipts by Selected Types of Business, Kentucky and Counties, 1982	83
State Sales and Use Tax Revenue, Kentucky and Counties, Calendar Years 1980-1986	84
Federal Government Expenditures or Obligations, Kentucky and Counties, Fiscal Year 1986	85
Bonded Indebtedness of Local Governments by Type of Governmental Unit, Kentucky and Counties, June 30, 1987	86
Net Assessed Value of Real Property Assessed by Property Valuation Administrators by Type of Property, Kentucky and Counties, January 1, 1987	87

Table Title	Table Number
Net Assessed Value of Tangible Personal Property Assessed by Property Valuation Administrators by Type of Property, Kentucky and Counties, January 1, 1987	88
Registered Voters by Party Affiliation, Race, and Sex, Kentucky and Counties, 1988	89
Passenger Car Registration, Kentucky and Counties, 1970-1986	90
Transfer Payments by Selected Categories, Kentucky and Counties, 1986	91
Traffic Accidents by Type of Accident, Kentucky and Counties, 1985-1986	92
Reported Major Crimes, Kentucky and Counties, 1986	93
Public Schools, Kentucky School Districts, Fiscal Year 1986-87	94
Fall Enrollments at Kentucky Higher Education Institutions, 1983-1986	95
Enrollment in Kentucky Colleges and Universities by Type of Institution and Student Origin: Counties, Kentucky, Other States, and Foreign, 1986	96
Authorization to Purchase Food Stamps, Kentucky and Counties, 1987	97
Aid to Families with Dependent Children (AFDC), Cases and Payments, Kentucky and Counties, 1986-1987	98
Medicaid Eligible Recipients by Basis of Need and Payments, Kentucky Counties, 1987	99
Per Capita Personal Income, Civilian Labor Force, Unemployment Rate, Population, States and the United States, 1980 and 1987	100
Personal Income, Kentucky, Southeast, and the United States 1960-1987,	101
Cash Receipts for Agricultural Commodities with Ranks, United States and States, 1986	102
Selected Manufacturing Statistics, United States and States, 1985	103
State Tax Collections by Source, United States and States, 1986	104
General Expenditures of State Governments, by Function, United States and States, 1986	105

Table Title	Table Number
Selected Public Elementary and Secondary School and Higher Education Statistics, United States and States, 1987	106
Consumer Price Indices and Implicit Price Deflator for Gross National Product, Personal Consumption Expenditures, United States 1977-1987	107

--	Administrative and auxiliary	77	77	63
--	Nonclassifiable establishments	2,495	3,681	10,118

Note: Establishments for which all employees are exempt from FICA (Federal Insurance Contributions Act) are excluded. These include the following types of establishments: government, railroad employment jointly covered by Social Security and railroad retirement programs, self-employed persons, domestic service, agricultural production, foreign, and ships at sea. In 1984, FICA coverage became mandatory for employees of nonprofit organizations; hence nonprofit organizations are included in establishment counts beginning with 1984. Establishment counts are based on a determination of active status as of anytime during the year.

[1]State and Local Government included in "Total" but not distributed by Division.

Note: A dash (-) indicates data that are not disclosed because either 1) there are fewer than three reporting units or 2) one reporting unit accounts for at least 80% of an industry's employment.

[1]Includes unclassified establishments.

Note: Establishments for which all employees are exempt from FICA (Federal Insurance Contributions Act) are excluded. These include the following types of establishments: government, railroad employment jointly covered by Social Security and railroad retirement programs, self-employed persons, domestic service, agricultural production, foreign, and ships at sea. In 1984, FICA coverage became mandatory for employees of nonprofit organizations; hence nonprofit organizations are included in establishment counts. Establishment counts are based on a determination of active status as of anytime during the year.

[1]Breathitt and Knott counties are divided between the Hazard and Martin Districts.

Note: Eastern Kentucky districts include Harlan, Hazard, Martin, and Pikeville. The Madisonville district encompasses the Western Kentucky coal fields.

[1]Counties without operations subjected to Kentucky severance tax are not included.
[2]Tax totals do not equal actual receipts because penalty and interest were not allocated.

Note: The letter D indicates that there were three or fewer operations, and that data were withheld to maintain the confidentiality of individual firms.

Notes: A dash (-) indicates that no establishments were reported. The following counties are not listed because no mineral industry establishments were reported: Allen, Anderson, Ballard, Bath, Boone, Bourbon, Boyd, Boyle, Bracken, Breckinridge, Caldwell, Calloway, Carlisle, Carroll, Carter, Casey, Clark, Crittenden, Cumberland, Edmonson, Fleming, Fulton, Gallatin, Garrard, Grant, Graves, Grayson, Green, Greenup, Hancock, Hardin, Harlan, Harrison, Hart, Henry, Hickman, Jackson, Jessamine, Kenton, Lewis, Lincoln, Livingston, Logan, Lyon, McCracken, Madison, Marion, Marshall, Meade, Menifee, Mercer, Metcalfe, Monroe, Montgomery, Morgan, Muhlenburg, Nicholas, Oldham, Owen, Owsley, Pendleton, Robertson, Rockcastle, Rowan, Russell, Scott, Shelby, Simpson, Spencer, Todd, Trigg, Trimble, Washington, Wayne, Wolfe, Woodford. A dash (-) indicates no establishments reported. The census reported 8 metal mining establishments for Kentucky which were not identified by county.

Other States[2]	30,981,183	35,408,510	32,956,133	30,428,742	35,499,324	44,551,778	55,074,311

[1]1985 figure inflated due to large "back-tax" payment.
[2]The amounts shown from other states are estimated collections from vendors which do not have retail outlets in Kentucky, including mail-order houses and stores located in bordering states which collect the tax from Kentuckians by agreement with the Revenue Cabinet.

Note: Excludes cases eligible for less than $10 grant and cases under AFDC suspense for one month. Dollar amounts include retropayments and special non-continuing payments from hearings. Kentucky average payments for cases and recipients in 1986 were $193.20 and $71.95, respectively. Comparible figures for 1987 were $193.58 and $72.45.

APPENDIX A:

METHODS FOR SIMPLIFYING THE COMPARISON OF STATISTICAL DATA

by Don Soule

Users of the **1988 Kentucky Statistical Abstract** may wish to use the data it contains to analyze differences and changes over time, or to compare the economic characteristics of different areas. To facilitate such analyses, this appendix explains and illustrates several of the more commonly used statistical adjustment methods, using data from the abstract. Although more complicated statistical methods are available, the emphasis here is on methods that are easily used and readily understood by the general user.

Complicated and diverse data series can be reduced to simpler forms to more clearly illustrate differences among data series and differences in patterns of change over the years. Many problems in interpreting raw data arise because data series, in their original form, differ in absolute size and in type of data.

The types of adjustment methods explained and illustrated are: index number series; annual percent changes; per capita amounts; correction for inflation; and parts as percents of totals. Comparisons are among Kentucky data series and between data series for Kentucky, the Southeast, and the nation, using illustrations based on tabular data. For all tables, the source for original, raw number data is the U.S. Bureau of Economic Analysis, 1988.

Index Number Series

Table A-1 presents total personal income, in millions of dollars, for all resident persons in Kentucky, the Southeast, and the United States for 1960, 1970, and for each year in the period 1980 to 1987. Two differences in the data are obvious: all values increased greatly over the years, and there are large differences in absolute size among the three groups. Because of these large changes and differences, it is not easy to see at a glance which of the three series has had the slowest and fastest growth over the period shown. What are needed are one or more simple statistical adjustment methods that will isolate and emphasize the differences and changes among these three series.

Table A-2 presents the total personal income amounts as percents of the 1980 amounts, thereby causing the three series to be identical at 100 in 1980 and to vary from 100 in other years. Conversion to index numbers makes the comparison easier and the differences more obvious. To compute an index number, first choose a year as the base year (1980 in this example). Next, divide each number in the series by the value for the base year, and multiply the result by 100. Do the same for the other series that you wish to compare, being sure to use the same base year for each series. For example, the calculation to compute the 1987 index for Kentucky personal income with 1980 as the base year is:

$$\frac{44{,}945}{29{,}401} \times 100 = 152.9$$

This conversion eliminates the very large difference in absolute size among the three series, and makes more obvious the degrees of differences in changes over the years among the three series. For example, both Kentucky and the Southeast grew in total personal income at greater rates than did the nation, over the period from 1960 to 1980. However, the Southeast continued this above-average rate of growth after 1980 while Kentucky's rate of increase decreased relative to that of the nation. These differences in rates of growth can be observed in the dollar amounts shown in Table A-1, but only with great effort. (Note that index number series could be computed using any of the years as the base year and equal to 100 percent, or an average of two or more years could be used as the base.)

Annual Percent Changes

Another method for comparing changes over the years in total personal income across the three areas is to compute percentage changes between years. Subtract the value for the earlier year from the value for the latter year; divide the result by the value for the earlier, and multiply that result by 100%. That is, the change from 1980 to 1981 is expressed as a percent of the 1980 amount. These values are presented in Table A-3. For Kentucky, the calculation of this percent change is:

$$\frac{(32{,}738 - 29{,}401)}{29{,}401} \times 100\% = 11.3\%$$

For the entire period, the patterns of personal income growth as annual percent changes are similar to those shown by the index number series. An advantage of the annual percentage change method is that the three series are not made to have identical values (100 percent) in the particular year chosen as the base year of the index number series.

Per Capita Amounts

A very popular method for comparing statistical data for states or groups of states that differ in absolute size, is to divide total amounts by population to produce average amounts per person, or per capita amounts. For personal income, these amounts are referred to as per capita personal income. Data in this form are presented in Table A-4. Total personal income in Kentucky increased between 1986 and 1987 by $82,960 million while the nation's increased by $246,732 million. A data user might question whether Kentucky's increase was favorable or unfavorable, compared with that of the nation. But because of the very large difference in absolute size (the nation's increase was about 83 times that of Kentucky's), the question does not have an obvious answer. But when annual amounts of total personal income are divided by each year's population, the national amounts of per capita personal income in 1986 and 1987 are shown to be $14,606 and $15,481, while the Kentucky amounts are shown to be $11,268 and $12,059. The nation's income level increased by $875 per person on the average while Kentucky's income level increased by $791. The per capita adjustment, by causing national and Kentucky amounts to be similar in magnitude, allows easy recognition of differences in the state data as compared with the national data.

Per Capita Amounts as Percents of the National Average

The per capita adjustment also allows easy comparison of changes over the years by the method of expressing Kentucky and the Southeast amounts of per capita personal income as percents of the national per capita amounts. This causes the national per capita amounts to be 100 percent in each year, and the per capita amounts for Kentucky and the Southeast can be below or above 100 percent, indicating below-average or above-average levels of per capita personal income. Over the years, improvement relative to the national average is indicated if these values for a particular state increase, while decreases indicate worsening. This method is illustrated in Table A-5.

In 1960, Kentucky's per capita personal income was 71.8 percent of the national average while that of the Southeast was 73.6 percent. Both Kentucky and the Southeast were below the national average in per capita personal income in 1960, but Kentucky was lower than the Southeast. By 1981, Kentucky's per capita personal income had risen to 81.3 percent of the national average and the Southeast had risen to 86.0 percent. By 1986, however, Kentucky's per capita personal income

had fallen to 77.1 percent of the national average while the Southeast had risen to 86.9 percent. To compute a value for one area as a percent of a value for a second area, divide the value for the first area by the value for the second area, and multiply this result by 100%. The calculation for Kentucky's per capita personal income as a percent of U.S. per capita personal income for 1987 is:

$$\frac{12,059}{15,481} \text{ X } 100 = 77.9\%$$

Correction for Inflation Exaggeration

Data series measured in money values show large growth during periods of high inflation. For example, per capita personal income in Kentucky increased 30 percent ($9,277 to $12,059) between 1982 and 1987, as shown in Table A-4. This suggests that Kentuckians, on the average, experienced a 30 percent increase in purchasing power.

During that period, however, the average price of goods and services in the nation increased 19.5 percent. Consequently, the 30 percent increase in per capita personal income could purchase only about 10.5 percent more goods and services (30 - 19.5 = 10.5); the other 19.5 percent increase was the effect of inflation. Table A-6 illustrates the per capita personal income data from Table A-4 adjusted to remove the effect of inflation.

The data from Table A-4 were divided by an index of average price changes to produce the "deflated" or "real" values in Table A-6. This adjustment process requires two steps. First, an appropriate price index must be selected. Several of the regularly published price indexes are measures of the changes in average prices for goods and services in large segments of the U.S. economy. National indexes can be used in the absence of indexes for particular states or regions. The particular index used in Table A-6 is the Implicit Price Deflator which measures the weighted average change in prices of all final goods and services produced each year (that is, the nation's Gross National Product). Second, the price index values for each year are divided into the per capita personal income values for each corresponding year, and the results are multiplied by 100. For example, Kentucky's 1987 value from Table A-4 ($12,059), divided by the 1987 price index value (119.5), and the results multiplied by 100, gives 1987 real per capita personal income of $10,091:

$$\frac{\$12,059}{119.5} \text{ X } 100 = \$10,091$$

Note that the adjustment for inflation can be combined with other techniques such as indexing.

Percent Distribution

Table A-7 shows number of wage and salary jobs in Kentucky and the nation in 1980 and 1987, in total and with detail according to major industry groups. If your interest is in the distribution of employment among industry groups or how these distributions differ between Kentucky and the nation, or how these differences have changed over the years, the very large differences in magnitude of the Kentucky and national values make these comparisons difficult. For example, there were 1,041,000 mining jobs in the United States in 1980 and only 52,813 in Kentucky, but mining jobs represented 4 percent of the total jobs in Kentucky as compared with only 1.1 percent nationally. The greater relative importance of mining jobs in the Kentucky economy is not obvious in the Table A-7 data. Also, both Kentucky and the nation experienced decreases in the number of mining jobs from 1980 to 1987, but it is not obvious whether Kentucky or the nation suffered the greater degree of decrease (Kentucky decreased 26 percent and the nation decreased 31.4 percent). Differences in employment distribution among industries in Kentucky and the United States, and changes in these distributions over the years, can be more easily seen if the original data in number of jobs, in Table A-7, are converted to percents of total jobs, as in Table

A-8. More generally, analysis of parts of any total can be analyzed more easily if the parts are expressed as percents of the totals.

To create the percent distribution values in Table A-8, each of the values in the Kentucky 1980 column, for example, are divided by Kentucky total employment and multiplied by 100. Wage and salary jobs in the farm industry (26,315), divided by total wage and salary jobs (1,317,119), and multiplied by 100, gives 2.0 percent:

$$\frac{26{,}315}{1{,}317{,}119} \times 100\% = 2.0\%$$

That is, for each 100 wage and salary jobs in Kentucky in 1980, two were farm jobs. Similar computations are made for all parts of the relevant totals. Farm jobs, nationally, were 1.4 percent of total in 1980. Both Kentucky and the nation experienced declines between 1980 and 1987 in the relative importance of farm jobs, with Kentucky declining from 2.0 to 1.4 percent of total and the nation declining from 1.4 to 0.9 percent.

Other interesting differences between Kentucky and the United States are made more obvious by the conversion of data into percents of totals. For example, government jobs were relatively more important in Kentucky than in the nation in both 1980 and 1987, and this difference grew slightly for Kentucky between 1980 and 1987, when Kentucky declined by 2.7 percent points (21.0 - 18.3) while the nation declined by 3.5 percent points (20.9 - 17.4).

APPENDIX B:

NOTES ON DATA DEFINITIONS AND SOURCES

by Carol M. Straus

The purpose of this appendix is to offer brief definitions of key data concepts to help in the interpretation of data in this abstract. Rather than offer full, technical definitions, we have attempted to identify and answer some of the more frequently asked questions. Users of this abstract are encouraged to consult the original sources of data for more complete information, especially if they are using the data for research or analytic purposes.

CIVILIAN EMPLOYMENT, UNEMPLOYMENT AND LABOR FORCE

Civilian employment, unemployment, and labor force estimates are produced by the U.S. Bureau of Labor Statistics (BLS) in cooperation with a designated agency in each state. In Kentucky, this agency is the Kentucky Cabinet for Human Resources.

Labor force data are based on where people live, and hence are called residence-based estimates. They include persons age 16 and over, which means that they exclude persons under 16 who hold jobs and include retirement aged persons (age 65 and over). In contrast to some labor force estimates, which are generally available only at the national level, civilian statistics exclude members of the armed forces, and hence are civilian estimates. Both total and civilian labor force statistics are produced at the national level, but only civilian labor force statistics are produced at state and county levels. The total labor force includes members of the armed forces; the civilian labor force does not. In sum, the relevant population for state and local labor force data is civilian residents age 16 and over.

Civilian Employment -- Civilian employment is the sum of: a) all civilians who, during a designated week, did any work at all as paid employees, in their own businesses, profession, or on their own farm, or who worked 15 hours or more as unpaid workers in an enterprise operated by a member of the family; and b) all those who were not working but who had jobs or businesses from which they were temporarily absent because of illness, bad weather, vacation, labor-management disputes, or personal reasons, whether they were paid for the time off or were seeking other jobs.

Unemployment -- Unemployed persons are all civilians age 16 and over who had no employment during the designated week, were available for work, except for temporary illness, and had made specific efforts to find employment sometime during the prior 4 weeks. Persons who were waiting to be recalled to a job from which they had been laid off or were waiting to report to a new job within 30 days need not be looking for work to be classified as unemployed. Unemployment does not include "discouraged workers," who are persons that desire to work but not currently seeking work because they believe that obtaining employment would be impossible. It also does not include persons who choose not to be employed, such as students, homemakers, and retired persons.

Civilian Labor Force -- The civilian labor force is the sum of civilian employment and the unemployment, as defined above.

Civilian Unemployment Rate -- The civilian unemployment rate is the percent of the labor force that is unemployed.

COVERED EMPLOYMENT

Covered employment refers to employment that is covered under unemployment insurance, or employees who would qualify for unemployment benefits if they were laid off. Approximately 75 to 80 percent of Kentucky's labor force is covered by unemployment insurance; the remainder are concentrated among the self-employed and seasonal agriculture workers.

NUMBERS OF ESTABLISHMENTS

The U.S. Bureau of the Census's County Business Patterns (CBP) is the source for data on the numbers of establishments. Business uses of these data include analyzing market potential, measuring the effectiveness of sales and advertising programs, setting sales quotas and budgets, analyzing the industrial structure of regions, and making basic economic studies of small areas. Establishments are categorized according to Standard Industrial Classification (SIC) codes. (See description of SIC codes below).

An establishment is defined as a single physical location where business is conducted or where services or industrial operations are performed. Establishment counts are based on a determination of active status as of any time during the year. That is, establishments that operate for only part of the year because they either cease operations or begin operations in the relevant location are included.

The inclusion of establishments in the CBP statistics is related to coverage of employment by Social Security, or the Federal Insurance Contributions Act (FICA). CBP includes those establishments which have wage and salary employment and are covered by FICA. This includes establishments with FICA-covered wage and salary employment of private non-farm employers and of nonprofit organizations and religious organizations covered under the elective provisions of FICA. Establishments which are totally exempt from FICA are excluded. Types of exempt employment (and hence excluded establishments) include government, railroad with employment jointly covered by Social Security and railroad retirement programs, self-employed persons, domestic service, agricultural production, foreign, and ships at sea. Also, very small firms with no paid employees are <u>not</u> included in the CBP establishment counts.

Establishment estimates from the various economic censuses (Retail Trade, Construction, etc.) may or may not include proprietorships (self-employed) without employees, so it is important to check labels and documentation carefully.

PERSONAL INCOME

Personal income estimates are produced by the U.S. Bureau of Economic Analysis (BEA). Personal income is an estimate of all income received by, or on behalf of, residents of an area. It is a very inclusive estimate, and its production involves the use of administrative records and statistical products of numerous federal agencies that estimate types of monetary or nonmonetary income.

In addition to income of individuals, personal income includes income of non-profit organizations and other entities that exist to serve individuals. Examples of such entities include churches, charities, and private trust funds. Personal income includes earnings, cash transfer payments, dividend and interest income, and rental income. It also includes non-monetary income, including food stamps, medicaid and medicare, in-kind payments to employees (e.g. food, transportation, lodging), certain fringe benefits such as health insurance and pension plans, and net rental value of owner occupied housing.

Personal income is initially estimated as an aggregate figure; that is, it is an estimate of the total income received by, or on behalf of all individuals of an area, regardless of the size of the population. For comparing small areas such as counties, personal income is most often analyzed in its per capita form.

It is important to note that Personal Income estimates are frequently revised, and revised historical data are released along with first estimates for current or recent periods of time. This means that comparisons of personal income over time should be made with data from the same release. That is, when comparing last year's personal income with this year's, it is important to use the revised figures for last year that were released along with estimates for this year.

Per Capita Personal Income is the total income of an area divided by that area's population. It is often used as an indicator of the quality of consumer markets and the general strength of the economy. Note that because personal income is a more inclusive estimate of income than estimates of money income, per capita personal income tends to be considerably larger than estimates of per capita money income. Money income is the basis for estimates of **median family income**.

EARNINGS AND JOBS

Estimates of earnings and numbers of jobs are produced by the Bureau of Economic Analysis (BEA). The estimates are based on place of work, with industry categories based in Standard Industrial Classification (SIC) codes (see below). Although the term **employment** is used by the BEA, we have adopted the convention of using the term **jobs** to distinguish BEA estimates from the more familiar estimates of the Bureau of Labor Statistics.

Jobs estimates from BEA represent an attempt to measure the total number of jobs in a very inclusive way. Part-time are included along with full-time jobs, without attempts to exclude part-time jobs that involve very few hours. Because some individuals hold more than one job, estimates of jobs are not equivalent to the numbers of persons who are employed in at least one job. This is in contrast to Bureau of Labor Statistics (BLS) estimates of civilian employment (see Labor Force Data above). BEA jobs estimates also differ from BLS civilian employment estimates in that the former include members of the military and are based on place of work (location of the job) while the latter exclude members of the military and are residence based.

Earnings is defined as the sum of wage and salary payments, other labor income, and proprietors' income. Because proprietorships may lose money, it is possible for total earnings in some industrial categories to be negative.

Industry categories for BEA's estimates of employment and earnings correspond to the major industry divisions of the Standard Industrial Classification system (see below).

STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODES

Standard Industrial Classification codes were established by the Office of Budget and Management and are used as categories for reporting statistics by various federal agencies to identify and distinguish segments of the economy.

There are four levels of detail in the SIC codes for establishments. Within the several broad industry divisions, there are 2-digit, 3-digit, and 4-digit codes, with 4-digit codes having the greatest level of detail. The industry divisions are sometimes referred to as "1-digit" codes. For example, 3714 is the 4-digit code for motor vehicle parts and accessories, with 371 indicating the larger category of motor vehicles and motor vehicle equipment, 37 indicating the major group of transportation equipment within the industry division of manufacturing.

Frequently, in data organized according to broad categories, the category "agricultural services, forestry, and fisheries" is presented separately from farms or else appears in a set of "nonagricultural" categories. The agricultural services component of the category does not include farms; it includes establishments and industries that provide services to farms such as fertilizing, harvesting, and veterinary services. Numerous government data programs deal only with the non-farm sector of the economy or make a basic division between farm and non-farm sectors.

For an establishment that engages in a variety of activities, industry classification is based on the primary activity, which is determined by the principal product or group of products produced or distributed or by services rendered. For establishments with dispersed activities, the location is determined by the office location. In particular, for dispersed activities such as construction, transportation, communications, electric, gas, sanitary services, dispersed sales activities, and similar physically dispersed operations, establishments are represented by those relatively permanent main or branch offices, terminals, stations, etc., which are either (1) directly responsible for supervising such activities or (2) the base from which personnel operate to carry out these activities. Hence, the individual sites, projects, fields, networks, lines, or systems of such dispersed activities are not ordinarily considered to be establishments.
